COLOR SERIES

A Seamless Sensations 

Not only is earth the oldest building material in the world, it was also the first used by man to add colour both to himself and to his surrounding environment. From this experience an exciting new use originated, which upheld the traditions of Italy and led to the creation of a selection of clay mixtures with high impact colour and dynamic textures. With this collection, our aim was to enhance the ancestral origins of earth as a material. By combining the patterns and textures of earth with pure pigments, the material takes on a starring role, transformed into a new, intense, and ever-changing tiling option.
